Art Unit: 2811

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-8, drawn to a semiconductor device, classified in class 257, subclass 79.
- II. Claim9-16, drawn to a method of making a semiconductor device,classified in class 438, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, because the device of the Group I invention could be made by process(es) materially different from those/that of the Group II invention. For example, the device of Group I could be formed by a method that does not include a step of etching the LED epitaxial structure, i.e., by a method in which the LED epitaxial structure is not etched, because the device of Group I encompasses structures that have electrodes formed on the exposed side portions of unetched epitaxial layers.

Application/Control Number: 10/022,055

Art Unit: 2811

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is reminded of the notice published in the Official Gazette on March 26, 1996, "Guidance on Treatment of Product and Process Claims in Light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)." If, in response to a requirement for election between a product and a process of making, Applicant elects claims directed to the product, and the product is subsequently found allowable, withdrawn process claims which depend from, or otherwise include all the limitations of, the allowable product will be rejoined. Those process claims which do not depend from, or otherwise include all the limitations of, the allowable product will not be rejoined. Rejoined process claims will be fully examined for patentability under 37 CFR § 1.104 to 1.106. Process claims which depend from, or otherwise include all the limitations of, a patentable product claim will be entered as a matter of right if the amendment is presented prior to final rejection.

Art Unit: 2811

Rejoinder does not constitute a withdrawal of the requirement for restriction. Rejoinder is a new procedure first authorized by the OG notice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (703) 308-4894.

The fax phone number for this Group is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (703) 308-0956.
